FACULTY: SIR AATIF

SEMESTER CPISM
APTECH LEARNING SHAHRAH-E-FAISAL

INTRODUCTION

The thirst for learning, upgrading technical skills and applying the concepts in real life environment at a fast pace is what the industry demands from IT professionals today. However busy work schedules, far-flung locations, unavailability of convenient time-slots pose as major barriers when it comes to applying the concepts into realism. And hence the need to look out for alternative means of implementation in the form of laddered approach.

The above truly pose as constraints especially for our students too! With their busy schedules, it is indeed difficult for our students to keep up with the genuine and constant need for integrated application which can be seen live especially so in the field of IT education where technology can change on the spur of a moment. Well, technology does come to our rescue at such times!!

Keeping the above in mind and in tune with our constant endeavour to use Technology in our training model, we at Aptech have thought of revolutionizing the way our students learn and implement the concepts using tools themselves by providing a live and synchronous e-Project learning environment!

ACKNOWLEDGE

The thirst for learning, upgrading technical skills and applying the concepts in real life environment at a fast pace is what the industry demands from IT professionals today. However busy work schedules, far-flung locations, unavailability of convenient time-slots pose as major barriers when it comes to applying the concepts into realism. And hence the need to look out for alternative means of implementation in the form of laddered approach.

The above truly pose as constraints especially for our students too! With their busy schedules, it is indeed difficult for our students to keep up with the genuine and constant need for integrated application which can be seen live especially so in the field of IT education where technology can change on the spur of a moment. Well, technology does come to our rescue at such times!!

Keeping the above in mind and in tune with our constant endeavour to use Technology in our training model, we at Aptech have thought of revolutionizing the way our students learn and implement the concepts using tools themselves by providing a live and synchronous e-Project learning environment!

WHAT IS THIS E-PROJECT?

e-Project is a step-by-step learning environment that closely simulates the classroom and Lab based learning environment into actual implementation. It is a project implementation at your fingertips!! An electronic, live juncture on the machine that allows you to

- Practice step by step i.e. laddered approach.
- Build a larger more robust application.
- Usage of certain utilities in applications designed by user.
- Single program to unified code leading to a complete application.
- Learn implementation of concepts in a phased manner.
- Enhance skills and add value.
- Work on real life projects.
- Give a real life scenario and help to create applications more complicated and useful.
- Mentoring through email support.

OBJECTIVE OF THIS EPROJECT

The Objective of this program is to give a sample project to work on real life projects. These applications help you build a larger more robust application.

The objective is not to teach you JavaScript/Dreamweaver but to provide you with a real life scenario and help you create basic applications using the tools.

You can revise the chapters before you start with the project.

This project is meant for students who have completed the module of HTML5.

These programs should be done in the Lab sessions with assistance of the faculty if required.

It is very essential that a student has a clear understanding of the subject. Students should go through the project and solve the assignments as per requirements given.

Kindly get back to eProjects Team in case of any doubts regarding the application or its objectives.

REQUIREMENTS

The Web site is to be created based on the following requirements.

- The Home Page should be created making use of Sections with a suitable logo
- Few tips can be included in the blank space area of the webpage.
- The Menus must be included in the website.
- Links such as
 - Products and Menu
 - Fruit juices
 - Vegetable Juices
 - Smoothies
 - Protein Shakes
 - Winter Menu
 - Chocolate Juices
 - Mock Tails
- Store Location
- Franchising
- Catering
- Contact
- Feedback
- About us

Top MilkShakes

Oreo MilkShake

Smooth and delicious Oreo Milkshake – just blend, sip, and enjoy!

Rs.399

Strawberry MilkShake

Sip on the creamy goodness of our Strawberry Milk Shake.

Rs.399

Banana MilkShake

Indulge in creamy goodness with our refreshing Banana Milkshake!

Rs.399

Juice Process

Juice Process

Cleaning and Washing

Thoroughly clean the fruits or vegetables to remove dirt, pesticides, and any contaminants. This step is crucial to maintain hygiene and safety standards.

Peeling and Cutting

Depending on the type of produce, peeling and cutting might be necessary. For instance, citrus fruits may need peeling, while others might require chopping into smaller pieces for efficient juicing.

Juicing Process

Use juicers or extractors to obtain the juice. There are different types of juicers, such as centrifugal, masticating, or hydraulic presses, each suited for different fruits and vegetables.

Filtration

After extraction, the juice might undergo filtration to remove pulp, seeds, or any remaining solids, resulting in a smoother and clearer juice.

Pasteurization

Some manufacturers pasteurize juice by briefly heating it to kill bacteria and extend its shelf life. However, this step can affect the taste and nutritional content.

Packaging

Fill the juice into appropriate containers, such as bottles, cartons, or pouches, ensuring proper sealing and labeling.

Usage of navbar and footer:

Navigation bars and footers are the basic need of a website now a days so to fulfill this particular requirement we have designed navbar and footer in such a way that you can easily navigate on our website without any problem more information is given below:

Navbar:

Our Navbar contains 8 links with search, cart & Like Icon. which organize Shrek-Juice around globe categories .

images are attached below for better understanding:

This Menu Help User to Explore more Pages.

The Search Bar help User to Search To Juice.

Footer:

Our footer is divided into four parts **About Us, links , quick links contact** quick links are hyperlinked from where you can navigate from one page to another page .And also you can connect with us on Social media

NAVBAR-LINKS

All the links on navbar are properly hyperlinked

There is the detailed information about:

- Home
- Products
- Store Location
- Franchising
- Catering
- Contact
- Feedback
- About Us

313         <h2>Salman</h2>
314         <p>I just wanted to express my heartfelt gratitude for creating such a fantastical elixir as Shrek Juice. It's more than just a beverage; it's a testament to creativity, imagination, and craftsmanship. Your juice is a true masterpiece that transports me to a world of wonder and joy. Thank you for sharing your magic with the world!</p>

            transition: 0.5s ease all;
        }
    }

```

The screenshot shows a code editor window with the title bar "File Edit Selection View Go Run Terminal Help <- > Project". The left sidebar shows a file tree with "css > # Home.css > .Navbar". The main area contains the CSS code for the ".Navbar" class. The code includes styles for list items, anchor tags, a search bar, and a button, along with media queries for mobile devices. The code editor has a dark theme and includes status bars at the bottom with file information like "Ln 19, Col 18" and "Port: 5500".

```
# Home.css < File Edit Selection View Go Run Terminal Help <- > Project
css > # Home.css > .Navbar
    @import url("https://fonts.googleapis.com/css?family=Salsa");
    {
        padding: 0;
        margin: 0;
        font-family: 'salsa';
    }
    html{
        scroll-behavior:smooth;
    }
    body{
        background-color: #dbefc78;
    }
    .M-Menu{
        display: none;
    }
    .Navbar{
        display: flex;
        background-color: black;
        color: white;
        padding: 5px 40px 0px 40px;
        gap: 100px;
    }
    .N-Image{
        width: 12px;
    }
    .N-Image img{
        width: 100px;
    }
    .list ul{
        display: flex;
        gap: 30px;
        list-style: none;
    }
    .list{
        width: 75px;
        display: flex;
        align-items: center;
        justify-content: left;
    }
    .list li{
        position: relative;
        font-size: 20px;
        color: white;
        transition: 0.3s ease all;
    }
    .list li:hover{
        background-color: #5CA1E;
        color: white;
    }
```

This screenshot shows the same code editor window as the first one, but it includes an import statement at the top: "@import url('https://fonts.googleapis.com/css?family=Salsa');". The rest of the CSS code remains the same, defining styles for the .Navbar class and its components. The status bar at the bottom indicates "Ln 19, Col 18" and "Port: 5500".
